HIGH POWERED PHASOR/ULTRASONIC GENERATOR/PHASOR PAIN FIELD

Now at last a versatile device with uses ranging from a highly effective intrusion deterrent to a useful laboratory or research tool for various studies. It consists of a power controller section with all frequency synthesizing and programming controls accessible. Variable output level can power one to eight individual transducers with an equivalent sound pressure level of 115db each. Transducers may be mounted in an array for energy concentration or may be individually placed. Frequency range is from 5 to 25 kHz with compensation at the higher end. A test button and remote control jack are included.

CAUTION!! CAUTION!! PLEASE NOTE THAT THIS DEVICE WILL PRODUCE DISORIENTATION, PAINS, NAUSEA, PARANOIA AND A HOST OF PHYSIOLOGICAL EFFECTS. CHECK WITH YOUR LOCAL LAWS AS TO "USE" AS AN ACTUAL INTRUSION DEVICE AGAINST HUMANS.
